Live Online Cyber Security & Ethical Hacking Course

Knoa Labs · 12 modules · 3–4 months · Weekend batches (Sat & Sun, 2–3 hrs a day) · Up to 15 students · Lifetime recordings

01 · Cybersecurity Foundations & Security Mindset

CIA triad, defence-in-depth and zero trust, ethical vs malicious hacking, the cyber kill chain, CVEs and vulnerability scoring, and how VA, pentesting and red teaming differ.

CIA triad · Kill chain · Red, blue & purple teams

02 · Linux Fundamentals for Security Professionals

Set up Kali Linux with VirtualBox snapshots, then learn the file system, core commands, permissions (chmod, chown, SUID/SGID), Bash scripting and Linux logs for security monitoring.

Kali Linux · VirtualBox · Bash

03 · Networking Fundamentals & Protocol Analysis

Network types and topologies, OSI vs TCP/IP, HTTP, DNS, DHCP, ARP and SSH, TCP/UDP handshakes and attack surfaces, IP addressing and subnetting, and packet analysis with Wireshark.

Wireshark

04 · Windows Fundamentals & Cloud Security Basics

Windows architecture, NTFS permissions and the registry, then cloud models (IaaS, PaaS, SaaS), the shared responsibility model and IAM fundamentals.

Windows · NTFS · Cloud IAM

05 · Network & Wireless Exploitation

OSINT and reconnaissance, active scanning with Nmap, packet crafting with Hping3 and Netcat, password cracking, buffer overflow basics, the Metasploit Framework and wireless security.

Nmap · Metasploit · Hydra · John the Ripper · Aircrack-ng

06 · Web Application Fundamentals & Secure Development

How web apps work end to end: hosting on Linux with Apache2, web programming and SQL for security testing, an introduction to the OWASP Top 10 and secure coding principles.

Apache2 · SQL · OWASP Top 10

07 · Web & Network Application Security: Hands-On Labs

SQL injection, XSS, broken access control and IDOR, CSRF vs SSRF, authentication and session flaws, CORS misconfigurations, file upload to RCE, and insecure deserialization.

Burp Suite · OWASP ZAP · 22 hrs of labs

08 · API Penetration Testing

API fundamentals, the OWASP API Security Top 10, JWT attacks, and API enumeration and fuzzing.

OWASP API Top 10 · JWT

09 · Mobile Application Penetration Testing

Mobile app architecture, the OWASP Mobile Top 10, static analysis and APK decompilation, and dynamic analysis with Burp Suite.

APK decompilation · Burp Suite

10 · AI / LLM Security

The OWASP Top 10 for LLM applications, direct and indirect prompt injection, sensitive data leakage in AI systems, securing AI-integrated apps and AI red-teaming.

OWASP Top 10 for LLMs · Prompt injection

11 · Penetration Testing Reporting & Documentation

Report structure and risk ratings, writing for technical and business readers, evidence handling and chain of custody, and industry report standards.

Professional pentest report

12 · Career Readiness: Resume, Certifications & Interview Prep

A cybersecurity resume and portfolio, your certification roadmap, and technical and behavioural interview practice.

Resume · Portfolio · Mock interviews

Placement support · Capstone pentest report · Course certificate
